Application/Control Number: 09/783173

Art Unit: 1754

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, 24-27, 30-32, 35-39, 42-44 and 47-51, drawn to a catalyst and making it, classified in class 502, subclass 335+.
- II. Claims 22, 23, 28, 29, 33, 34, 40, 41, 45, 46 and 52-71, drawn to a fibril-containing material, and making it, classified in class 423, subclass 447.2+.
- 1. The inventions are distinct, each from the other because of the following reasons:

 Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the catalyst can be used in a different manner, such as destroying hazardous waste, or catalyzing hydrocarbon hydrogenation or isomerization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Applicant is advised that a complete reply must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (703) 308-2539.
